

Seminar Title: From Traditional Learning to E-Learning: Advantages and Challenges.

Presenter: Dr. Zana Rafiq Majeed

Location: College of Science, Mathematics Conference Hall, Salahaddin University-Erbil

Time and Date: Sunday, 21 Jan, 2018 from 10 am – 11 am

An e-learning talk presented by Dr. Zana Rafiq Majeed at College of Science, Salahaddin University-Erbil (SU) and the title of his presentation was: **“From Traditional Learning to E-Learning: Advantages and Challenges”**. The aim of this presentation was to talk about Erasmus+ program and its role in the development of the Erasmus+ Training Center at Salahaddin University-Erbil. Also, it was elaborated that in this program, representatives of SU had participated in a LMS training workshop at the University of Patras, Greece. Various types of pedagogical methods were discussed. More importantly, the advantages and disadvantages of traditional learning and e-learning were discussed. In this talk, the aim of the upcoming LMS workshop for SU staff explained. At the end, the audience was given a glimpse of the LMS workshop agenda. All the seminar participants were encouraged to take part in the LMS workshop and given the incentives to convert their traditional courses to online courses. It is worth mentioning that lecturers from different departments (Chemistry, Environmental Sciences, Biology, Computer Science & IT, Geology, Physics, and Mathematics) had attended this seminar. The LMS workshop will start in 04 Feb, 2018 and ends in 25 Apr, 2018. Most of the lectures at College of Science have already enthusiastically signed up to participate in the upcoming workshop. This workshop will have a big impact on training the lectures on how to use LMS to create their online courses. We work in collaboration with the IT center of SU to make this workshop a big success.

Pedagogical Methods

- Traditional learning
- E-learning
 - Online learning
 - Flipped Classroom learning
 - Blended learning

Traditional Learning

- Mostly focuses on the classroom education.
- The teacher usually talks more than the student.
- Student attendance is mandatory.

E-learning

- Defined as interactive learning.
- Engagement in an online educational course.
- More ease and flexibility.
- Utilization of audio and video recordings, presentations, quizzes, surveys, games, discussion groups, and more.

Traditional vs E-learning

Traditional Learning

- Teacher Centered
- Single Medium
- Isolated work
- Information delivery
- Factual-based learning
- Bricks and board

E-Learning

- Student Centered
- Multimedia
- Collaborative work
- Information Exchange
- Skills-based learning
- Technology-enabled learning

Online (distance) learning

MASSIVE

There may be
100,000+
students in a
MOOC.

OPEN

Anyone,
anywhere
can register
for these
courses.

ONLINE

Coursework
is delivered
entirely over
the Internet.

COURSE

MOOCs are
very similar
to most online
college courses.

Traditional Classroom

+

- Instructor prepares material to be delivered in class.
- Students listen to lectures and other guided instruction in class and take notes.
- Homework is assigned to demonstrate understanding.

Flipped Classroom

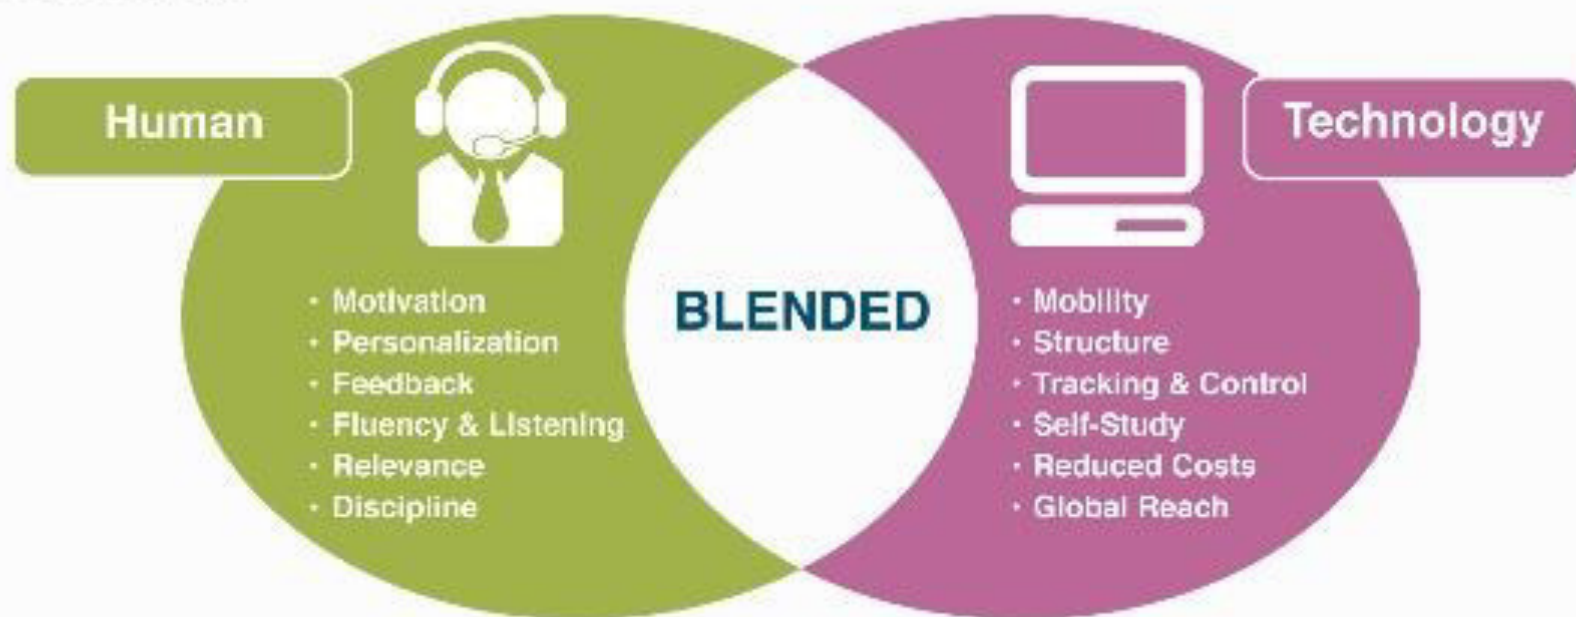

- Instructor records and shares lectures outside of class.
- Students watch / listen to lectures before coming to class.
- Class time is devoted to applied learning activities and more higher-order thinking tasks.
- Students receive support from instructor and peers as needed

Blended Learning Definition

- ▶ “...combining online resources and technology with face-to-face instruction by a licensed teacher.”

From an NEA Policy Brief on Blended Learning

<http://j.mp/1mL77aY>

Challenges faced by instructors in e-learning

- Instructors need to be effective
- Resistance to change and lack of time to convert
- Time consuming for individualized feedback
- Preparation and teaching load
- Need for technical assistance

Challenges faced by students in e-learning

- Adaptability Struggle
- Technical Issues and computer Literacy
- Time Management

Learning Management System

- An LMS delivers and manages instructional content
- Handles student registration
- Online course administration
- Tracking, and assessment of student work
- Help identify progress towards learning goals

What is Moodle?

- Stands for Modular Object-Oriented Dynamic Learning Environment.
- Moodle is a free, open source LMS that enables you to create powerful, flexible, and engaging online learning experiences.

Course Materials in Moodle

- Moodle enables you to add several kinds of course materials:
 - Static course material.
 - Interactive course materials.
 - Social course materials.
 - And many more activities and resources
